DEDICATION

To my mom, who has been my
greatest support and inspiration.

ACKNOWLEDGMENTS

First, I would like to thank my mother, who has been there for me from day one and who, despite the difficulties, has proven to be the strongest and bravest woman, serving as an example and inspiration for me. I also want to thank my friends for their companionship during my time at the university and, above all, for their unconditional support.

I would also like to thank my thesis advisor for his guidance and support throughout this research.

Foreign trade and sustainable development, an analysis for Ecuador

Summary

This graduation work examines the relationship between international trade and sustainable development in Ecuador. The research was conducted using the PRISMA method, based on the sustainable development theory and international trade. The importance of trade in sustainable development is highlighted, and its impacts on the environment, society, and the economy are analyzed. Measures to promote responsible trade practices, such as trade regulation and the protection of labor rights, are discussed. Different challenges, such as lack of coordination and limited resources, are identified, and recommendations are proposed to address them. It concludes that sustainable international trade is fundamental to achieving the Sustainable Development Goals and highlights success stories in Ecuador. Therefore, it emphasizes the need for clear public policies and collaboration between different actors to address environmental and social challenges.

Keywords: International trade, sustainable development, environment, policies.

Foreign Trade and Sustainable Development, an Analysis for Ecuador

Abstract

This paper examines the relationship between international trade and sustainable development in Ecuador. This research uses the PRISMA method, based on the sustainable development theory and international trade. The importance of trade in sustainable development is highlighted, and its impacts on the environment, society, and the economy are analyzed. Measures to promote responsible trade practices, such as trade regulation and the protection of labor rights, are discussed. Challenges such as the lack of coordination and limited resources are identified, and recommendations to address them are proposed. It concludes that sustainable international trade is fundamental to achieving the Sustainable Development Goals and highlights success stories in Ecuador. Therefore, it emphasizes the need for clear public policies and collaboration among various stakeholders to address environmental and social challenges.

Keywords: International trade, sustainable development, environment, politics.
